**[Apple Releases Security Update](#)**

*03/09/2016*

Original release date: March 09, 2016

Apple has released a security update for Windows 7 and later to address a vulnerability in Apple Software Update. Exploitation of this vulnerability may allow a remote attacker to take control of an affected system.

Users and administrators are encouraged to review the Apple security website for [Software Update 2.2](#) and apply the necessary update.
