Cyber Security Awareness Bulletin:

National Cyber Awareness System:

[Cisco Releases Security Updates](#)

03/09/2016

Original release date: March 09, 2016

Cisco has released security updates to address vulnerabilities in multiple products. Exploitation of one of these vulnerabilities could allow a remote attacker to take control of an affected device.

Users and administrators are encouraged to review the following Cisco Security Advisories and apply the necessary updates:

- Wireless Residential Gateway [information-disclosure vulnerability](#)
- Wireless Residential Gateway with EDVA [denial-of-service vulnerability](#)
- ASA Content Security and Control Security Services Module [denial-of-service vulnerability](#)
- Cable Modem with Digital Voice [remote-code-execution vulnerability](#)

For details on securing your home network, please see [US-CERT Tip ST15-002](#).

Stay connected with the Ministry of Home Affairs for information concerning national security and public safety.
